Grading Rubric – Project 2 – Final Report and Source Code *(15% of Project 2 Grade)*

Name(s):

Project Topic:

CATEGORY	Excellent - 2	Satisfactory - 1	Unsatisfactory - 0	Score
Source Code:	Complete source code is provided that can be easily compiled.	Incomplete source code is provided, or the code was difficult to build due to nonstandard compiler options.	No source code is provided.	
Source Code Instructions:	Sufficient instructions were provided to reproduce your project if desired.	Instructions were provided, but appear to omit key steps or leave questions unanswered for reproducing your work.	No installation and/or execution instructions were provided.	
Final Report: Introduction	The report contains a polished instruction describing the application built.	The final report contains a brief instruction describing the application built.	No introduction was provided.	
Final Report: Algorithm	The report contains a polished discussion of the algorithms used in your application, i.e. how does your application transfer, store, and process data?	The final report contains a brief discussion of the algorithms used.	No algorithm discussion was provided.	
Final Report: Infrastructure Used	The report contains a summary of the AWS services used, along with a discussion of the functionality they provide.	The final report contains a brief list of the AWS services used, but includes no discussion of why they were used (i.e. what services do they provide?)	No summary of AWS services used was provided.	
Final Report: Results and Analysis	**Double points for this category:** The report contains a polished discussion of the failure modes of your application. What failures will your application tolerate, what failures will it not tolerate, and how could you improve fault tolerance given additional implementation time?	The report contains a shallow discussion of application failure modes with limited creativity shown for all possible failures that could occur.	No discussion of application failure modes was provided.	**x 2**
Final Report: Feedback	Report provides useful feedback on the easiest and hardest parts of this project, along with suggestions for future versions of this class.		No feedback on the project was provided.	
Final Report: References	Report lists references that were useful in this project, and may be useful to other students in future versions of this class.		No references were provided.	
			Total Score (out of 18)
